AB - J52007828 Zinc ions are continuously supplied to a plating bath using zinc metal and a counter electrode with low over voltage and which is less noble than Zn, whereupon Zn dissolves. The counter electrode is pref. of Fe, Co, Ni, Cu, Ag, Au, Pt etc. Steel sheet with a surface coating of cast iron, Mo steel or iron oxide is partic. suitable.

IW - CONTINUOUS PLATE OPERATE ALKALINE ZINC BATH CONTAIN NO CYANIDE COMPOUND ZINC ION CONTINUE SUPPLY

IKW - CONTINUOUS PLATE OPERATE ALKALINE ZINC BATH CONTAIN NO CYANIDE COMPOUND ZINC ION CONTINUE SUPPLY
